

Feb. 14, 2020 1000 hrs

Mount Tolmie park, approx $\frac{1}{2}$ way up.

sunny with clouds, slight breeze. 7°C

grassy, meadow like area with Garry oak trees surrounding. Some exposed rock and boulders in the area. There is evidence of deer, scat present in grass near trail.

many leafless trees, appearing to be beginning to bud.
this appears to be consistent across the area.

small birds hopping through underbrush and flying around. unknown species

There are human made trails as well as a paved road, some picnic tables. Some city signs up throughout park.
